## **Product Highlights**

AkitaBox Capture simplifies, expedites, and increases accuracy of facility data collection in the field. Facilities management (FM) teams reduce the time and cost of collecting and updating asset data and are armed with better information to perform day-to-day tasks. Decision-makers are empowered with real-time, comprehensive facilities data and the ability to track overall facility portfolio health and condition changes.

### Available on iOS and Android

Staff can use the Capture App on iOS and Android tablets for easy data collection in the field.

## Collect data offline and auto sync when you connect

Data collection continues regardless of connection to Wi-Fi or cell signal. When used offline AkitaBox Capture will automatically synchronize with the system when you connect.

### **Optical Character Recognition (OCR)**

The OCR feature easily transfers text in photos into asset data fields, reducing the time spent and risk of human error when manually transferring the data.

### Visual, location-based mapping interface

Dynamic, digital facility mapping lets you pin each asset's location, allowing you to find assets more quickly and accurately.

## AkitaBox Capture can be used for many asset data collection initiatives including:

- Asset inventory and updates
- Facility condition assessments
- Energy audits
- Energy, sustainability, governance
- Inspections & compliance tracking
- Technology audits
- Capital planning
- Fire-Life-Safety audits
- ADA compliance reporting
- And more!
